### **DETAILED ACTION**

1. Applicant's response to the Office Action mailed on March 17, 2008 on May 7, 2008, is acknowledged.
2. Claims 1-16 have been canceled. Claims 17-20 and 22 are pending. Claim 17 is under examination.
3. The following Objection/Rejection is or remains applicable:

#### ***Claim Objection***

4. Claim 17 is objected to because of the following informalities:

For clarity and precision of claim language it is suggested that claim 17 is amended to read "...solution is a cryoprecipitate, a supernatant or an extract of a recombinant cell culture".

Correction is required.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 17 is rejected under 35 U.S.C. 102(e) as being anticipated by Mitterer et al. (U.S. Patent No. 6,953,837, February 27, 1997).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Mitterer et al. teach a factor VIII:C which is substantially free from platelet-agglutinating vWF activity, obtainable from a factor VIII/vWF-containing solutions (see paragraph 21). Mitterer et al. also teach a step-wise elution, a salt concentration (between 250 and 300 mM) and the use of a cation exchanger (see abstract and paragraph 2). Mitterer et al. teach that the starting materials are ...plasma, a plasma fraction, cryoprecipitate or a supernatant or extract of a recombinant cell culture (paragraph 15). Therefore, the limitation of the claim is met by the reference.

***Response to Arguments***

6. Applicant's response filed June 7, 2008 has been considered. Note that a new objection and rejection has been instituted for the reasons set forth above. All withdrawn method claims will be considered for a rejoinder once there is an allowable product claim. Withdrawn method claims need to have the same scope as the allowed product claim, thus applicant should amend these claims during prosecution of the product claim.

***Conclusion***

7. No claims are presently allowable.
